

Kaspar Baris

Spring is blooming.

Snowdrops bloom in March

From April to May, the leaves bloom

Enough to hibernate

When spring calls outside.

The spring frosts will disappear once,

And heat waves will begin,

Rain, thunder, lightning and puddles

Come in the spring, you will really like it!

When you get a headache in the summer

Sunscreen won't help you

A bottle of water, juice or alcohol

There will be no guard for you!

Enjoy the spring heat,

Summer will come and everything will change

If you don't like the summer heat

30 degrees and the heat will decrease
